PROTECT THE BABY YOU CARE FOR BY PROTECTING YOURSELF!

GET VACCINATED AGAINST **PERTUSSIS**, also known as **WHOOPING COUGH**.

Pertussis (Whooping Cough) is a serious disease for babies that is spreading in Connecticut and across the United States. Adults and older children can give pertussis to babies.

PARENTS, GRANDPARENTS AND CAREGIVERS, between the ages of 18 and 64, can protect themselves and the infants they care for by getting vaccinated.

Effective January 3, 2011, please call the West Haven Health Department for a time to get vaccinated.

(203) 937-3660.

The vaccine is free.

Tdap is a combination vaccine that contains 3 components: Tetanus, diphtheria and pertussis. A once in a lifetime shot is recommended for those between 11 and 64 years.
